Key Features & Benefits

Accessibility: 24/7 - This online university is available from any browser anywhere in the world.

Delivery: Cloud based LMS. No need to invest in, or install, hardware or software.

Mobile: App available for Apple or Android, all learning fully accessible.

Learner Experience: Instructional video courses designed with the modern learner in mind – engaging and granular content including quizzes to help them check their understanding.

Structured: Customized learning paths to assist staff that are new to JD Edwards and ensure each student gets the most out of the EOne Academy.
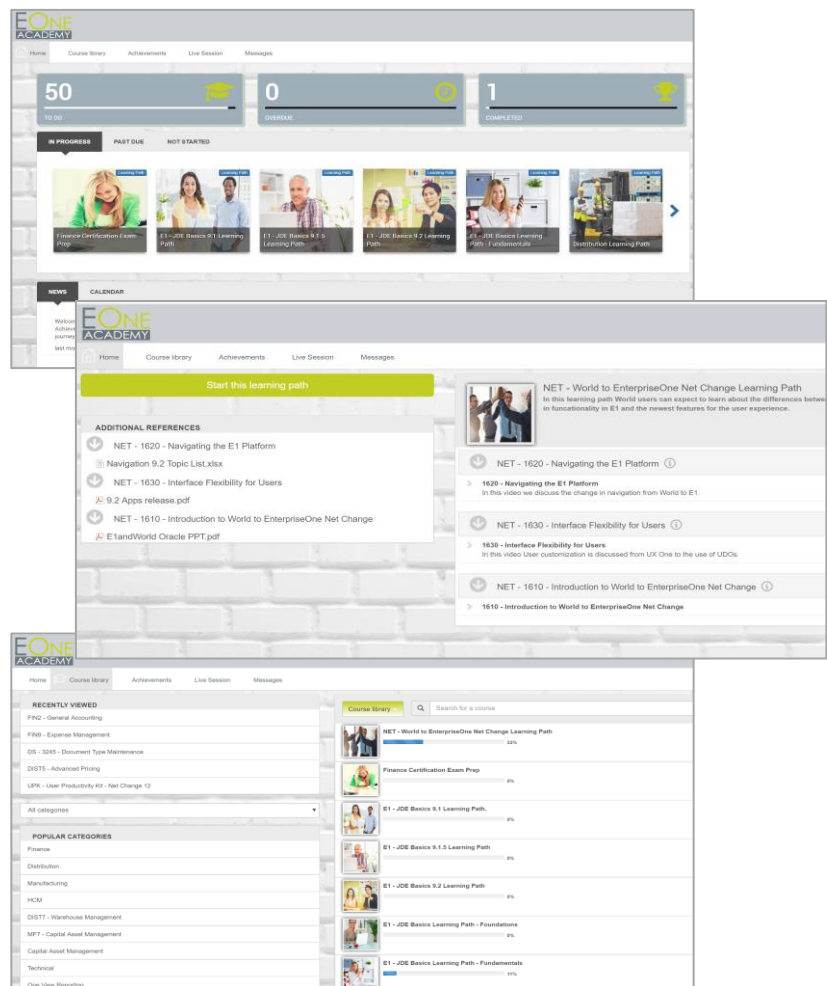

Comprehensive: Over 750 courses covering Foundations, Financials, Distribution, Manufacturing, HCM, CNC, UPK and more.

Easy to Use: Course design and content have been designed based on over 15 years of JDE training experience.

Custom Learning for JD Edwards World to EnterpriseOne

The new World to EOne Learning Curriculum includes new courses on the important differences between the products, introductions to the new navigation and tools release features specifically leveraging a World user's knowledge and addressing their concerns, identification of the key changes and new functionality by application area and access to the full suite of EnterpriseOne learning.

- Save time by improving the learning process for your JDE experts
- 'Teach to the Difference' by Focusing on what is new to World users
- Substantially reduce the cost of training across multiple audiences
- Increase the accessibility of accurate and current JDE information

Enable your upgrade:

"The EOne Academy was invaluable during our install. The on-demand solution allowed our Project Team to access the training for the specific modules they needed when they needed it during the project plan. iLearn helped us create the curriculums for each person and guides us in the learning process. They were instrumental in our implementation success." - Director of ERP, Switch

EOne Academy™ World to EnterpriseOne Curriculum

Sample General Ledger Course Mapping - World to EOne Net Change to EOne Academy Course:

Delta: Planning and Budgeting	EOne Academy Course: 2360 Budgeting
Added fifteen-year forecasting. Establish what if budgets going out for 15 years without impacting your live transactional tables. This can be done based on numbers like actual, budgets, or any field stored in the accounts ledger table. Utilize an unlimited number of iterations and scenarios in which seasonal patterns and growth patterns can be applied. Once finished, these budget numbers can be copied over to your live budget.	

Delta: Journal Entry Reversal Control	EOne Academy Course: 2320 Journal Entries
Record a journal entry reversal the first day of the next period or the last day of the next period. Offer more control in defining when a reversing journal entry is recorded. These accruals are recorded in one period and then reversed in the next to avoid double counting.	

Delta: Financial Burdening - Burden Actual Rate Calculations EOne Academy Course: 2345 Burdening
List and validate applied burden rates and actual burdened amounts using the Actual Rate Calculation report. Track target and provisional rates per burden category. Understand and validate burdens associated with applied rates and actual amounts. Meet requirements for target and provisional rates tracking.
