- Composed Pages: Designer Pane
- Classic Pages
- CaféOne

Manage UDOs

- Images
- Create E1 Search Groups Part 1
- Task Index Builds (Springboard)
- Manage Security for UDOs
- Manage UDOs with Web Object Management Workbench (OMW)
- Object Usage Tracker
- Orchestrator Overview

UX One

- UX One Interface Overview
- Create UX One Roles
- The Page Composer
- Add Charts to a Composed Page
- Add a Designer Pane
- Add One View Reports to UX One Pages
- Add Watchlists to UX One Pages
- Add a Springboard to UX One Pages
- Add URLs to a Composed Page
- Add a Classic Page to a Composed Page
- Create CaféOne Layouts
- UDO Management

Orchestrator

Orchestrator Overview

- Orchestrator Studio Overview

Service Requests

- Service Requests Overview
- Record a Process to Create a Form Request
- Create a Data Request
- Create a Message Request
- Create a Connector Request
- Create a Custom Request

Service Requests - Cntd.

- Create a Report Request
- Create a Watchlist Request

Orchestrator Setup

- Create a Rule
- Create a White List
- Create a Cross Reference
- Create a Connection

Notifications

- Notifications Overview
- Create a Simple Notification
- Create a Notification from an Orchestration
- Create a Notification from a Watchlist

- Subscribe to Notifications
- Assign Subscriptions to Notifications

Orchestrations

- Design and Run an Orchestration
- Create an Orchestration with Multiple Components

Orchestrator Tools

- Orchestrator Tools Overview
- Create Schedules and Add them to Orchestrations/Notifications Scheduler
- Orchestrator Monitor
- Use Form Extensions to Invoke an Orchestration

Orchestrator Practice

- Record a Form Request Practice
- Design and Run an Orchestration Practice

Finance

General Accounting

- General Accounting Overview
- General Ledger Automatic Accounting Instructions (AAls)
- Journal Entries
- Intercompany Settlements
- Allocations
- Burdening
- Multicurrency
- Cash Forecasting
- Budgets
- Month End and Year End Processing
- Taxes
- Reconciliation
- Balance Restatement
