

EOne Academy Course List

Navigation

JDE Foundations

- ERP History
- JD Edwards History
- Speaking JDE
- A Decade of JDE with Oracle
- How Does Oracle View the Future of the Cloud

JDE Fundamentals

- Rules of JDE
- Account Structure
- JDE Environment
- Address Book
- User Defined Codes (UDCs)
- Processing Options
- Configure Next Numbers
- Interpret Errors
- Create New Application Version and Add to Menu

JDE Navigation 9.2

- Menu Navigation
- Interface Features
- The Carousel
- Favorites

JDE Navigation 9.2 – Contd.

- Recent Reports
- Work with Applications
- Customize the Grid
- Data Browser
- Work with Records
- Collaborate Tool
- Manage User Defined Objects
- Advanced Queries UDO
- Create Pages with Page Composer
- E1 Pages 9.2 UX: Create Direct Links with Page Composer
- E1 Pages 9.2 UX: Create Process Flows Using Designer Pane
- E1 Pages 9.2 UX: Create a UX Dynamic Page with Watchlists and Springboard
- Watchlists UDO
- Attach Media Objects
- CaféOne: Composite Application Framework UDO 9.2
- Pages UDO
- Export and Import Grid Data

EnterpriseOne Net Change

- Net Change 9.1.3 Tools Overview
- Net Change 9.1.3 One View Enhancements
- Net Change 9.1.5 Menu Navigation Overview
- Net Change 9.1.5 The Carousel
- Net Change 9.1.5 Favorites
- Net Change 9.1.5 Grid Enhancements
- What's New in 9.2

Citizen Developer

Citizen Developer Navigation

- Menu Navigation
- Preferences
- Favorites
- Carousel
- Recent Reports
- Breadcrumbs
- Work with Application
- Work with Reports
- Export and Import Grid Data

Work with User Defined Objects

- User Defined Objects (UDOs)
 - Overview
- Grid Customization
- Rename Grid Headers
- List View
- Form Personalization
- Form Extensions
- Rename Form, Row, and Report Exits
- Grid Summarization
- Advanced Queries
- Watchlists
- Composed Pages
- Composed Pages: Designer Pane
- Classic Pages
- CaféOne

Manage UDOs

- Images
- Create E1 Search Groups
- Task Index Builds (Springboard)
- Manage Security for UDOs
- Manage UDOs with Web Object Management Workbench (OMW)
- Object Usage Tracker
- Orchestrator Overview

UX One

- UX One Interface Overview
- Create UX One Roles
- The Page Composer
- Add Charts to a Composed Page
- Add a Designer Pane
- Add One View Reports to UX One Pages
- Add Watchlists to UX One Pages
- Add a Springboard to UX One Pages
- Add URLs to a Composed Page
- Add a Classic Page to a Composed Page
- Create CaféOne Layouts
- UDO Management

UX One Roles

- Manage Roles and Pre-Built UX One Pages
- Assign Roles to Environments
- General Accounting Manager
- Accounts Payable Manager
- Accounts Receivable Manager
- Plant Manager
- Production Manager

UX One Roles - Cont.

- Asset Manager
- Customer Service Manager
- Inventory Control Manager
- Shipping Supervisor
- Payroll Manager

Orchestrator

Orchestrator Overview

- Orchestrator Studio Overview

Service Requests

- Service Requests Overview
- Record a Process to Create a Form Request
- Create a Data Request
- Create a Message Request
- Create a Connector Request
- Create a Custom Request
- Create a Report Request
- Create a Watchlist Request

Orchestrator Setup

- Create a Rule
- Create a White List
- Create a Cross Reference
- Create a Connection

Notifications

- Notifications Overview
- Create a Simple Notification
- Create a Notification from a Watchlist
- Subscribe to Notifications
- Assign Subscriptions to Notifications
- Create a Notification from an Orchestration

Orchestrations

- Design and Run an Orchestration
- Create an Orchestration with Multiple Components

Orchestrator Tools

- Orchestrator Tools Overview
- Create Schedules and Add to Orchestrations/Notifications
- Scheduler
- Orchestrator Monitor
- Use Form Extensions to Invoke an Orchestration

Orchestrator Practice

- Record a Form Request Practice
- Design and Run an Orchestration Practice

Finance

General Accounting

- General Accounting Overview
- General Ledger Automatic Accounting Instructions (AAIs)
- Journal Entries
- Intercompany Settlements
- Allocations
- Burdening
- Multicurrency
- Cash Forecasting
- Budgets
- Month End and Year End Processing
- Taxes
- Reconciliation
- Balance Restatement
- Reports and Inquiries
- General Ledger Integrity Reports
- Constants

Accounts Payable

- Procure to Pay Process
- Accounts Payable Overview
- Tables
- Constants
- Automatic Accounting Instructions (AAIs)
- User Defined Code (UDC) Tables
- Next Numbers
- Supplier Master
- Payment Terms
- Voucher Entry Processing Overview
- Voucher Entry
- Voucher Match
- Automatic Payments
- Manual Payments
- AP Draft Processing
- Batch Voucher Process
- Voucher Match Automation Overview
- Voucher Match Automation Setup
- Voucher Match Automation Processing
- Post Accounts Payable Transactions to the GL
- Approve and Post Accounts Payable Payments
- 1099 Processing
- Reports and Inquiries
- Accounts Payable Integrity Reports

Accounts Receivable

- Accounts Receivable Overview
- Define Lines of Business
- Accounts Receivable Setup
- Set Up Accounts Receivable AAls
- Accounts Receivable UDCs
- Customer Master Records
- Invoice Entry
- Manual Receipts
- Automatic Receipts Processing
- Post Accounts Receivable Invoices
- Revise receipts to the GL
- Deduction Processing
- Netting
- Credit Reimbursements
- Credits and Collections
- Inquiries and Reports
- Accounts Receivable Integrity Reports

Fixed Assets

- Fixed Assets Overview
- System Foundation Setup
- System Setup
- Category Code Mapping
- Manage Asset Records
- Assets Split
- Track Asset Locations
- Assets Disposal
- User Defined Depreciation
- Asset Depreciation
- Journal Entries and Transactions
- Fixed Assets Reports
- Fixed Assets Integrity Reports
- Fixed Assets Transfer

Job Cost

- Job Cost Overview
- Change Management Overview
- Job Master Records
- Cost Code Structure and Chart Types
- Budgets
- Job Status Inquiry
- Job Progress Management
- Performance Based Labor Forecasting
- Profit Recognition
- Draws

Organization Setup and Finance

- Organization Setup and Financial Overview
- Organization Setup
- Category Codes Setup

Organization Setup and Finance - Contd.

- Fiscal Date Patterns
- Bank Account Setup
- GL Class Codes

Revenue Recognition

- Revenue Recognition Setup
- Revenue Recognition Process
- Additional Methods
- Revenue Recognition Functional Overview

Contract and Service Billing

- Contract Billing Overview
- Contrast of Contract Billing and Service Billing
- Address Book, Customer Master, and Job Information
- Contracts
- Contract Billing Lines
- Contract Billing Workfile
- Contract Invoices Process
- Service Billing Overview
- Service Billing Setup
- Service Billing AAls
- Service Billing Additional Tables
- Service Billing Workfile Transactions Overview
- Service Billing Workfile Concept
- Recognize Revenue for Service Billing and Contract Billing
- Service Billing Invoices Process

Advanced Cost Accounting

- Advanced Cost Accounting Overview
- Advanced Cost Accounting Setup
- Cost Analyzer
- Activity Based Costing Reporting

Expense Management

- Expense Management Overview
- Expense Management Setup
- Group and Employee Profiles
- Expense Reports
- Expense Reports Approval
- Auditing
- Reimbursement Reporting
- Mobile Expense Demo
- Mobile Expense Entry
- Mobile Expense Approvals

Job Cost: Advanced Job Forecasting

- Advanced Job Forecasting Overview
- Formulas and Methods of Computation Setup
- Build a Job Forecast

Lease Accounting

- Lease Accounting Overview
- Lease Accounting Setup
- Lease Accounting AAls Setup
- Lease Accounting Bill Code Setup
- Create an Asset Master Record in Lease Accounting
- Create a Unit Master Record in Lease Accounting
- Create and Review a Property Lease
- Create and Review a Non-Property Lease
- Enter Lease Clause Information
- Enter Manual Billing
- Review and Post Manual Billing
- Create, Review, and Delete an Amortization Schedule
- Create and Review Commencement Journal Entries
- Create, Review, and Post End of Month Balance Sheet Journal Entries
- Delete or Void a Lease Accounting Batch
- Change a Lease Term
- Remeasure and Post a Lease
- Enter a Lease Termination
- Generate a Termination Entry
- Review Lease Accounting Inquiries
- Run Lease Accounting Reports
- Generate Recurring Billing

Distribution

Procurement

- Procurement Overview
- Order Activity Rules
- Procurement AAls
- Supplier Information
- Supplier Item
- Supplier Templates
- Line Types
- Requisitions
- Quotes
- Blanket Orders

Procurement – Cont.

- Enter Purchase Order
- Purchase Order Generator
- Approvals
- Purchase Order Printing
- Enter Subcontract Purchase Orders
- Change Order Process
- Receiving, Reversals, and Receipt Routing
- Tolerance
- Landed Cost
- Process Rebates
- Voucher Match
- Reports and Inquiries
- Service Purchase Orders

Sales Order Management

- Sales Order Management Overview
- Customer Information
- Order Activity Rules
- Sales Order Entry
- Templates
- Base Pricing
- Preferences
- Preferences with Advanced Pricing
- Direct Ship Orders
- Credit Orders
- Backorders
- Item Cross Reference
- Quote Order Process
- Order Holds
- Transfer Orders
- Return Material Authorizations (RMAs)
- Print Messages
- Pick Slips
- Ship Confirmations
- Create Shipping Documents
- Invoices
- Sales Update
- Commissions
- Sales Order Inquiries

Advanced Pricing

- Advanced Pricing Overview
- Advanced Pricing Setup
- Base Pricing
- Complex Groups
- Price Adjustment Definition
- Price and Adjustment Detail Revisions
- Rounding Rules
- Free Goods
- Variable Price Adjustments

Advanced Pricing – Cont.

- Repricing
- Volume Incentive Adjustments
- Rebates
- Buying Structures
- Price Approval Process
- Accelerated Pricing Resolution Engine
- Price Matrix
- Pricing Workbench
- Customer Price List

Fulfillment

- Fulfillment Overview
- Setup and Activation
- Rule Setup
- Customer Billing Setup and Scoring
- Fulfillment Preferences
- Fulfillment Processing

Distribution Setup

- Distribution Setup Overview
- Branch Plant Constants
- System Constants
- Inventory AAls
- Order Activity Rules for Sales and Purchasing
- Document Type Maintenance
- Line Types
- Category Codes
- Sales Order Holds
- Item Master
- Item Branch Plant
- Item Location Setup
- Speed Location Maintenance
- Item Cross Reference
- Non-Stock Item Master

Inventory Management

- Inventory Management Overview
- Inventory Transactions
- Location Setup
- Cycle Count
- Item Cross Reference
- Lot Processing
- Segmented Items
- Cross Docking
- Kits
- Inventory ABC Analysis
- Dual Unit of Measure
- Print Messages
- Inventory Interoperability
- Perform Mass Updates
- Work Center
- Purge Inventory Records
- Inventory Inquiries
- Inventory Reports

Transportation

- Transportation Overview
- Activating Transportation Management
- Transportation Setup
- Set Up Transportation Rates
- Route Setup for Transportation
- Intermodal Shipments
- Vehicle Setup
- Loads and Load Building – Part 1
- Shipping Document Process
- Work with Shipments
- Transportation End of Day Processes
- Transportation Inquiries
- Inbound Transportation
- Pooled Shipments
- Shipment Tracking

Warehouse Management

- Warehouse Management Overview
- Activating Warehouse Management
- Create Locations
- Item Master/Item Branch
- Order Groups
- Container and Carton Codes
- Request Inclusion Rules
- Location Profiles
- Location Dimension
- Location Characteristics
- Capacity Definition by Item/Group
- Speed Group Maintenance
- Item Profile Revisions
- Unit of Measure Definition by Item/Group
- Preference Master
- Putaway Movement Rules
- Picking Movement Rules
- Replenishment Movement Rules
- Random Putaway Requirements
- Fixed Location Replenishment Setup
- Putaway Requests
- Process Putaway Requests
- Putaway Confirmation
- Picking Requests
- Process Pick Requests
- Pick Confirmation
- Ship Confirmation
- Bulk Pick Requests
- Cross Docking Workbench
- Fixed Location Replenishment Processing
- Manual Replenishment

Warehouse Management – Cont.

Process Replenishment Requests
Confirm Replenishments
Manual Planner
Advanced and Technical Operations
Inquiries and Reports
License Plating Setup
License Plate Daily Processing
Pick, Pack, and Ship Overview
Cartonization and Carton Reorganization Overview
UCC128 and ASN Processing Overview
Shipment Pieces Overview
Shipment Tracking Overview

Manufacturing

Shop Floor

Shop Floor Control Overview
Shop Floor Control Setup
Work Order Processing
Work Order Processing: Backflush and Super Backflush
Work Order Processing: Lot Control and Serialized Work Orders
Bill of Materials: Phantom Items
Alternate Bills of Material and Routings
Bill of Materials: Substitute Items
Outside Operations
Scheduling Inquiries
Materials Inquiries
Reports
Process Operations
Global Updates
Mass Work Order Maintenance Demo
Lean Manufacturing Overview
Kanban Manufacturing Overview

Product Data Management

Product Data Management Overview
Distribution and Manufacturing AAls (DMAAls)
Bills of Material
Bills of Material: Substitute Items
Bills of Material: Batch Bills
Bills of Material: Percent Bills
Bills of Material: Phantom Items
Bills of Material: Inquiries
Routing Instructions

Product Data Management – Cntd.

Routing Instructions: Master Routings
Routing Inquiries

Configurator

Configurator Overview
Item Master and Item Branch Setup for Configurator
Configurator Constants
Configured Item Segments
Cross Segment Editing Rules
Configuring CSERs and Dynamic Processing
Assembly Inclusion Rules (AIRs):
P and Q Rules
AIRs: R Rules
AIRs: X Rules
AIRs: C Rules
AIRs: H Rules
Advanced AIRs: Tables
Advanced AIRs: Smart Parts
Advanced AIRs: External Field and Program
Advanced AIRs: Other
Transaction Types
Advanced AIRs: Configured Components
Configurator Sales Order Entry
Other Configured Order Types
Configurator Work Order Processing

Manufacturing Overviews

Manufacturing Overview
Project Manufacturing Overview
Types of Manufacturing Overview
Plant Manager's Dashboard Overview
Lean Manufacturing Overview
Product Data Management Overview
Forecasting Overview
Resource and Capacity Planning Overview
MPS and MRP Overview
Configurator Overview
Shop Floor and Work Orders Overview

Manufacturing Overviews – Cntd.

Demand Flow Manufacturing Overview
Quality Management Overview

Material Requirements Planning (MRP)

MRP Overview
Item Branch MRP Values Setup
MRP System Setup
Multi-Facility Planning Setup
Program P3482/P3483 Processing Options Setup
Submit MRP
Planning Family Review Inquiry
MRP Messages Inquiry
Time Series Inquiry
Pegging Inquiry
Supply and Demand Inquiry

Payroll

- Payroll Processing Overview
- Pay Cycle Setup
- Payroll IDs
- Execution Control Parameters
- Pre-Payroll
- Pro Forma Journal Entries
- Payment Printing
- Reports Only Processing
- Final Update
- Interim Check Entry
- Online Employee History Inquiry
- Company Options
- Tax Information for Employers

Technical

Configurable Network

Computing (CNC) Overviews

- CNC Overview
- CNC 101
- Understanding JDE Server Functions Overview
- Understanding Environments and Pathcodes Overview
- Understanding Data Sources Overview
- Understanding JDE Middleware Overview
- Understanding OMW Overview
- Understanding Server Manager Overview
- Understanding Basic Security Overview
- Understanding OCMs Overview
- Understanding Basic Object Types Overview
- Installation Roadmap
- Server Manager

CNC

- CNC Overview
- CNC 101
- Server Functions
- Environments and Pathcodes
- Data Sources
- JDE Middleware Overview
- Object Management Workbench (OMW)
- Basic Package Activity
- Batch and Interactive Differences
- Job Queue Maintenance
- Server Manager
- Basic Security

CNC – Cntd.

- Object Configuration Management (OCMs)
- Tasks and Task Relationships
- Basic Object Types
- Printing
- Media Objects
- Installation Roadmap
- Pages for CNCs

Universal Batch Engine (UBE) Development and BI Publisher

- UBE Development Overview and Data Dictionary Items
- Tables
- Business Views
- Group Report
- Business View Joins, Data Selection and Sequencing, and Level Breaks
- Event Rules Overview
- Event Rules: Variable Creation and Assignment
- Event Rules: Statements and Aggregates
- Event Rules: Additional System Functions
- Event Rules: Table IO
- Debugging
- Processing Options
- PDF vs CSV Output
- Business Functions
- Columnar and Tabular Reports
- BI Publisher Part 1: Overview and Process
- BI Publisher Part 2: Overview and Process Continued
- BI Publisher Part 3: 3rd Party Tool
- BI Publisher Part 4: Report Definition, Bursting, and Data Driven Delivery
- BI Publisher Part 5: Components Recap
- Default Printer
- Logos and Barcodes Explained
- 9.2 Development Tools Overview Guide

Grower Management

Grower Management Foundations Setup

- Grower Management Overview
- Foundation Setup

Grower Management

Foundations Setup – Cntd.

- Harvest Pattern Setup
- Grower Cost Center Defaults
- Owner Master Setup
- End Use Reservations
- Attributes of Crops
- Geographic Areas
- Material Type
- Varieties
- Styles
- Blend Constants Setup
- Wineries Setup
- Winery Constants Setup

Farms and Blocks - Setup

- Farm Setup
- Blocks Setup
- Maturity Date Calculations and Mass Updates

Harvests

- Harvest Overview
- Create a Harvest
- Harvest Information
- Update Harvests: Harvest Workbench
- Harvest Estimates
- Freeze Harvest Estimates
- View Supply and Demand
- Speed and Mass Updates

Farming Operations Setup

- Farming Operations Setup
- Equipment Setup
- Resources Setup
- Consumables Setup
- Additives Setup
- Spray Master Setup
- Quality Tests
- Quality Tests: Result Name Setup
- Quality Tests: Conversions Setup
- Quality Test: Definition Setup
- Quality Test: Panel Setup
- Quality Test: Equipment Setup
- Quality Test: Consumables Setup

Farming Operations

- Base Operations
- Configured Operations
- Create an Operation
- Configured Operations: Planning and Implementation
- Sample: Cultivate Operation
- Sample: Herbicide Operation
- Sample: Farm QA Operation
- Sample: Schedule Harvest Op
- Operation Status

Weigh Tag Operations

- Weigh Tag Overview
- Enter Weigh Tags
- Close a Weigh Tag Operation with Speed Operation Update
- Close a Weigh Tag Operation
- Partial Receipts Control Flag
- Attributes on Weigh Tag Operations
- Interoperability and Weigh Tags

Grower Management Costs

- Grower Management Costs Overview
- Grower Costing Setup and Process
- Cost Component Setup
- Cost Group Setup
- Cost Group Setup
- General Ledger Category/Cost Group Cross Reference Setup
- Equipment Costs
- Resource Costs
- Consumables and Spray Costs
- Operational Costs
- Expense Spread
- Operations Accounting

Grower Pricing and Payments

- Grower Pricing and Payments Overview
- Prerequisites and Setup
- Contracts Overview
- Contract Header
- Contract Block
- Contract Harvest
- Maintain Contracts
- Contract Pricing
- Process Payments
- Complete the Harvest
- Mass Updates
- Final Settlement
- Pay on Proceeds

One View Reporting

One View Reporting (OVR) 9.2 Basics

- One View Reporting 9.2 Overview
- One View Reporting Overview Webinar
- Access, Run, and Filter One View Reports
- Define Reports in the One View Manager

OVR 9.2 Basics – Cont.

- Create One View Reports with a Standard Application
- Create One View Reports Using the Databrowser
- Launch One View Reports from Task IDs and E1 Pages
- Introduction to BI Publisher
- Formatting Components in BI Publisher for One View Reports
- Personalize One View Reports in BI Publisher
- Create Boiler Plate Templates in BI Publisher
- Create Pivot Tables and Calculations in One View Reports
- Create Drillback Links for a One View Reports
- Translate a One View Report into Another Language
- Promote a One View Report
- Create One View Reports with an OVR Application
- Formatting Components in BI Publisher for One View Reports

One View Financial Statements

- One View Financial Statement Overview
- Create a One View Financial Statement Column Definition
- Create a One View Financial Statement Sub Total Row Definition
- Create One View Financial Statement Versions
- One View Financials Examining Errors in Statement Definitions
- Formatting Tips for One View Financial Statement Layouts
- Generate and Review a One View Financial Statement
- Manage One View Financial Statements Layouts
- Financial Statement Data with Grouping Elements Definition
- Preview a One View Financial Statement Definition

User Productivity Kit

User Productivity Kit (UPK) 11 Developer Content (Not Listed Here)

UPK 12 Developer Content

Feature Packs

Feature Packs 9.2.2

- Feature Pack 9.2.2.4: Form Extensions
- Feature Pack 9.2.2.4: Rename Grid Headers
- Feature Pack 9.2.2.4: Rename Row, Form, and Report Exits

Feature Packs 9.2.3

- Feature Pack 9.2.3: Enhancements Overview
- Feature Pack 9.2.3.4: Enhancements Overview

Feature Packs 9.2.4.1

- Feature Pack 9.2.4.1: Enhancements Overview

Feature Pack 9.2.4.1 – Cont.

Feature Pack 9.2.4.1: Form Security Personalization
Feature Pack 9.2.4.1: Application Update
Feature Pack 9.2.4.1: Color Code Environment
Feature Pack 9.2.4.1: Form Extensibility

Feature Pack 9.2.4.3

Feature Pack 9.2.4.3 Tools Overview
Feature Pack 9.2.4.3 Finance Enhancements
Feature Pack 9.2.4.3 Project Costing Enhancements
Feature Pack 9.2.4.3 Inventory Enhancements
Feature Pack 9.2.4.3 Procurement Enhancements
Feature Pack 9.2.4.3 Quality Enhancements
Feature Pack 9.2.4.3 Warehouse Enhancements
Feature Pack 9.2.4.3 Manufacturing Enhancements
Feature Pack 9.2.4.3 Capital Asset Management and Management Enhancements
Feature Pack 9.2.4.3 Human Capital Management Enhancements
Feature Pack 9.2.4.3 Grower Management Enhancements
Feature Pack 9.2.4.3 Real Estate Management Enhancements

Feature Pack 9.2.5

Feature Pack 9.2.5: General Ledger
Feature Pack 9.2.5: Accounts Payable
Feature Pack 9.2.5: Fixed Assets
Feature Pack 9.2.5: Expense Management
Feature Pack 9.2.5: Project Costing
Feature Pack 9.2.5: Lease Accounting
Feature Pack 9.2.5: Inventory
Feature Pack 9.2.5: Order Management
Feature Pack 9.2.5: Advanced Pricing
Feature Pack 9.2.5: Transportation
Feature Pack 9.2.5: Warehouse Management

Feature Pack 9.2.5 – Cont.

Feature Pack 9.2.5: Manufacturing
Feature Pack 9.2.5: Requirements Planning
Feature Pack 9.2.5: Quality Management
Feature Pack 9.2.5: Address Book Updates
Feature Pack 9.2.5: Agreement Management
Feature Pack 9.2.5: Capital Asset Management
Feature Pack 9.2.5: Legislative, Regulatory, and Localization Updates
Feature Pack 9.2.5 Tools Update: Overview
Feature Pack 9.2.5 Tools Update: User Experience
Feature Pack 9.2.5 Tools Update: Digital Transformation
Feature Pack 9.2.5 Tools Update: System Automation
Feature Pack 9.2.5 Tools Update: Security
Feature Pack 9.2.5 Tools Update: Open Platforms and Platform Certifications

WHO

WHAT

WHEN

- Business Analysts
- Super Users
- Individuals with new functional responsibilities
- Anyone who needs to boost their JDE knowledge and skillset

- Over 30 modules and 900+ courses
- Video instruction by senior JDE instructors
- A live practice environment
- Quizzes based on Oracle Certification exams
- Related white papers, implementation guides and case studies
- Learning paths for targeted instruction
- Easy learner tracking, reporting and analytics
- A live personal Learning Advisor

- You are starting a new role or cross-training
- You are studying for an Oracle Certification exam
- You are a super user or business analyst
- You are a consultant

Need a Solution for Your End Users?

WHO

WHAT

WHEN

- End Users
- New employees
- New to JDE

- Proven, updated curriculum from the experts
- Intuitive, at-point-of need end user training
- Built-in tracking, reporting, and points and badges
- Navigation, EOne Foundations and EOne processes including Citizen Developer core content and organizational structure
- Learning path development, customizations and live training support

- You have a tools or major upgrade
- You have a new implementation
- You have new users or new employees
